# High Leverage Diagonal Cutter

*features PowerEdge geometry for longer cutting life*

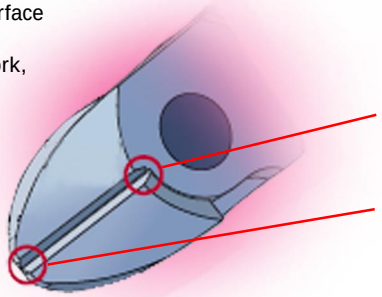
***for more leverage with less effort***

## PowerEdge geometry

Our exclusive cutting edges have a top flat surface that tapers from back to front to provide more cutting surface by the joint for tough work, and fine tips for delicate wire.

Hold this Snap-on cutter up to the light and you'll see a slight relief back toward the joint, and tips that come together perfectly.

PowerEdge cutters cycled more than 5,000 times through hardened music wire without significant wear, and the tips still aligned.



- More cutting surface close to the joint for power cuts. The slight gap close to the joint keeps
- the tips from wearing prematurely during power cuts, keeping them sharp for more delicate cutting

Old-fashioned hand-finished edges can't match PowerEdge durability.

- Improved ergonomic handle design
- Quality forged steel
- Differential heat treatment produces strength & toughness in desired ares
- Induction hardened, precision sharpened using current CNC technology

- Improved cushion grips for comfort and control
- Joint is positioned close to the cutting edge for greater leverage
