

Sockets for those extra long clamps found on Heavy Duty trucks

204FIHC

4 Piece 3/8" Drive Heavy Duty Truck Hose Clamp Socket Set

Features and Benefits

- 7/16" size found on intercooler hose clamps on Freightliner, Peterbilt and Kenworth trucks
- 1/2" size found on Caterpillar Acert engines where there is one hose clamp at the turbo and 3 at the DPF filter
- 8mm size found on the upper and lower radiator hoses on International trucks
- 10mm size found on Cummins ISX engines at the EGR valve at all the intake components

Application

- The 204FIHC sockets are designed for the extra long band clamps found on heavy duty trucks. Current 3/8" deep chrome and 3/8" deep impact sockets do not clear the studs.

Note the longer studs on these hose clamps

See page two for individual socket list, socket dimensions and warnings.

CE – Not Required

Country of Origin – United States
