EFPIRONMAN EFPIRNMANDIS

EFPIRNMANDIS Distressed Iron Man Welding Helmet

Additional Features and Benefits

- Helmet is much more flexible to get into tighter spaces
- Additional 1-1/4" of material on top of helmet for more coverage
- Cooler for the user as it will not heat up as much as ABS version

WARNING

- The welding helmet lens is breakable and does not provide complete protection from flying particles, severe impact hazards and/or corrosive liquids.

Wear ANSI approved safety goggles.

Flying particles can cause eye or other bodily injuries.

- An auto-darkening welding helmet may fail to automatically darken upon striking an arc or lighting a gas torch.

Stop the welding or cutting process immediately. Contact your Snap-on representative for repairs. Do not attempt to repair the welding helmet yourself.

Welding without a darkened welding lens causes ultraviolet rays to burn the eyes.

Read additional safety warnings on pages W1 to W4 in Catalog 1300
