

# Snap-on Cooling System Barrier Tool Allows Changing Components without Draining the System

SVTS2000

*The most powerful tool of its type on the market!\**

## Features and Benefits

- Uses shop air to create a vacuum barrier
- Attaches with commonly available adaptors
- Switch from coolant retention to pressure testing by turning valve handle
- Higher suction volume than competitive units
- Clear hose for easy confirmation of coolant movement
- Blow off spring prevents over-pressurization

CE – Not required

\*When measured by free air capacity

Country of origin: USA

# SVTS2000

## Applications

Replace coolant temperature sensors  
knock sensors,  
upper and lower hoses,  
heater control valve, heater hoses,  
thermostats and more,  
without draining coolant

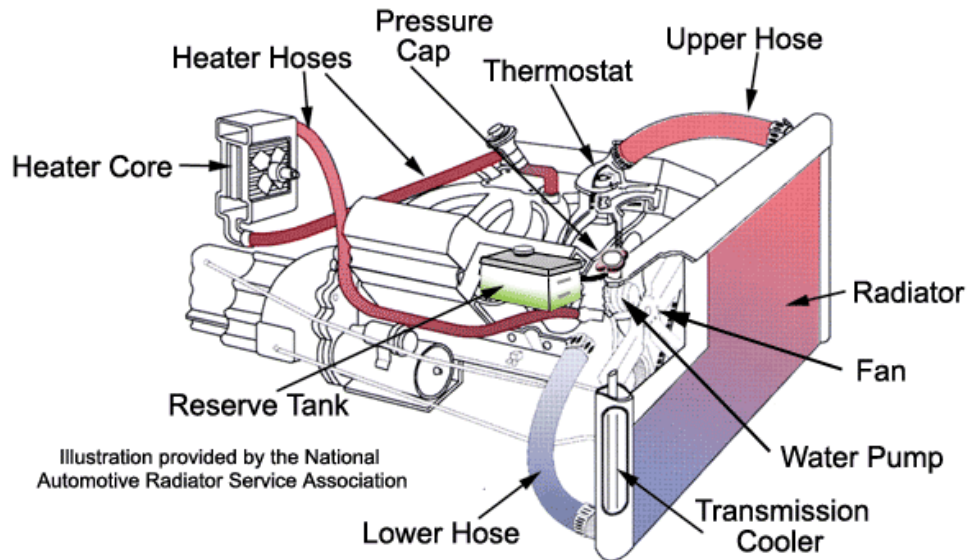

Illustration provided by the National Automotive Radiator Service Association

## WARNINGS

- Wear safety goggles. (User and bystanders)
- Do not exceed rated pressures
- Read additional safety precautions on pages W1 to W4 in product catalog CAT1200.
