

## New EEFI301A Master Fuel Injection Pressure Testing Set services domestic and foreign fuel injected engines

Use the **EEFI301A Master Fuel Injection Pressure Testing Set** to test both mechanical fuel injection systems (CIS) and electronic injection systems (TBI, CFI, CPI, PFI) on domestic and import vehicles. The set contains a manifold and gauge assembly with a ball valve, test ports and all needed adaptors. Also includes O-rings, protective caps, valve cores and washers to maintain adaptors and manifold assembly. The adaptors fit 80% of today's vehicles. Plastic case and complete applications manual included. Forthcoming adaptor sets soon to be announced will handle the remaining 20% vehicles. These sets include EEFI302A Extended Application Set, EEFI303A Return Line Set and EEFI304A Low Pressure Gauge.

### EEFI301A Features and Benefits

- Measures pressure before & after fuel filter
- Adaptors available for testing at the fuel filter inlet/outlet & at multiple locations on the fuel system loop
- For use on all systems with or without test ports
- Comfortable, easily hand-held design, with rugged boot for durability
- Fuel pressure gauge assembly: 2-1/2" dia. gauge, 19" manifold and hose assembly
- Bright, easy to read, with text image: 0-100 psi (700 kPa) in 5 psi increments
- Quick coupler connections between hoses and adaptors for ease of use
- Includes adaptors for 80% of today's vehicles with optional sets for servicing remaining 20%
- Large Instruction manual includes 67-pages of vehicle application tables

### WARNING

- Flammable liquid and fumes can ignite.

Wear safety shield (user and bystanders).

Pressurized flammable liquid; do not expose to flames, sparks or other resources of ignition.

Read and follow instructions. Ignited liquid and fumes can cause injury.

Accumulated fumes can ignite. Wear safety shield (user and bystanders).

Use only in well ventilated area. Flames can cause injury.

- Pinpoint tests domestic and import fuel injection systems—with or without test ports
- Adaptors permit in-line testing at critical points in the fuel system loop
- Troubleshoot problems caused by restrictions or defective components
